Engineering

This course covers the analysis and design (geotechnical and concrete design) of the basic and most commonly used types of foundations including both shallow and deep foundations. Other types of foundations are covered in the follow-up course, "Foundation Engineering 2".

provides students with both a rigorous foundation in theory and the practical, hands-on experience they need to succeed in the field. Graduate Education At the graduate level, CEE runs two very successful professional engineering programs, the Master of Engineering and the interdepartmental Master of Science in Transportation.
