On a Ford 172 or Ford 192 industrial engine the distributor drive rod performs a very important function. This Ford 172 distributor drive shaft is a hex sided shaft made of hardened steel, 3.93" long with chamfered ends. This drive rod connects the distributor with the oil pump. The Ford 172 or 192 engine's

Find the engine, casting, or part number. Ford places the part number in various locations, depending on the engine. Common locations include the rear of the engine, near the starter mount and bellhousing, on the front of the block's right side (when looking at it from the front), on the left side of in-line-cylinder engines, or by the oil filter mount.
