Non-medical influences on medical decision-making ...

The primary outcome identified influences on prescribing decision-making by non-medical prescribers; secondary outcomes included their management of otitis media and respiratory tract infections and their pharmacological knowledge and decision-making. Given the small number of papers retrieved, it was decided not to exclude any based on quality.

Influences on prescribing decision-making among non ...

Ultimately non medical prescribing must improve care for patients. It requires a high level of skill, expertise and judgement, not only in deciding what to prescribe, but in deciding what not to prescribe, what to discontinue and when, and an awareness of medicines knowledge and individual limitations.

Reading this prompts me to another question - apart from the differences in Quality Systems between ISO 13485 and ISO 9001 and FDA 21 CFR part 820, what changes are expected in the mindsets of people working on medical products and non medical products. The most important thing I perceive is GMP concepts, good documentation practices etc.

Medical vs. Non Medical - Differences in Quality Systems

Beside medical factors, non-medical grounds can hold an impact on the likeliness of holding a Cesarean delivery every bit good. Among those factors, maternal features such as age, instruction, business, birth order, fiscal position (salary/affordability to pay medical fees and wellness insurance) , abode, figure of prenatal visits, wellness position can greatly act upon the Cesarean delivery rate.

Home Health Care vs. Non-Medical Home Care - SeniorCare.com

In the UK, the majority of non-medical prescribers (NMPs) are nurses or pharmacists working in community or primary care. However, little is known about what influences their decisions to prescribe, unlike with medical prescribing. It is also unclear whether the medical findings can be extrapolated, given their very different prescribing training.

Factors influencing nurse and pharmacist willingness to ...

The Importance of Non-Medical Home Care. The non-medical home care industry is growing largely because of the influx of seniors into the marketplace. In fact, over 10,000 people are turning 65 every day for the next 10 years. There are already more people over the age of 65 than those 15 years or younger.

In the case of medical schools, however,
rankings guide in ways more profound
than just economic, for they influence
the patient-doctor relationship. Asking
“What medical school did you attend?”
is rarely a query about the research
funding and capabilities of a doctor's
alma mater, criteria most frequently
reflected in popular rankings.
