A tour de force. Drawing on recent work in the philosophy of language, evolutionary biology, and ethology, Daniel Cloud has fashioned a new account of the origins of our capacity for linguistic communication.

The Domestication of Language

Domestication is the strategy of making text closely conform to the culture of the language being translated to, which may involve the loss of information from the source text.

Foreignization is the strategy of retaining information from the source text, and involves deliberately breaking the conventions of the target language to preserve its meaning. [1]

Domestication and foreignization - Wikipedia

Transmission of language and culture Language is transmitted culturally; that is, it is learned. To a lesser extent it is taught, when parents, for example, deliberately encourage their children to talk and to respond to talk, correct their mistakes, and enlarge their vocabulary.

Language - Language and culture | Britannica

Theoretically, domesticating translation takes language as a tool of communication. In translation practice, it will make a translated text as readable as possible in the TL, without any traces of the source text linguistics or unfamiliar expressions, making it fluent and, as Venuti puts it, transparent.

Domestication and Foreignization in Translation Free Essay ...

The biggest characteristic of domestication translation is to use fluent idiomatic English translation, in this kind of translation, translators efforts concealed by fluent translation, the translator is invisible, hidden the differences between different cultures, the target language replaced the target language cultural values of the mainstream culture, the strangeness of the original has been played down, translation and become more transparent.

The domestication of language : cultural evolution and the ...

Domestication involves both culture and biology. The cultural process of domestication begins when animals are incorporated into the social structure of a human community and become objects of ownership, inheritance, purchase and exchange. The morphological changes that occur in domestic animals come second to this integration into human society.

The process of domestication - CLUTTON-BROCK - 1992 ...

Domestication is the strategy of making a text closely conform to the culture of the language being translated to, which may involve the loss of information from the source text so as to focus on the target audience. This happens primarily when a certain situation does not exist in the target culture.
