The .308 Win was released in 1952, two years before the US military adopted the 7.62 NATO. The two cartridges are loaded to different pressures, with the civilian .308 round at 62,000 pounds per square inch (psi), while the military 7.62 NATO is loaded to 50,000 copper units of pressure (CUP), which equates to an estimated 58,000 psi.

Another trend has been to moving to lighter high BC bullets such as the new Sierra Matchking VLD 155gr bullet and the Lapua 155gr Scenar, and launching them fairly rapidly, up around 2900 fps. This has proved to be a successful combination with competitive Palma shooters and can prove effective for sniping use as well.

The M24 Sniper Weapon System (SWS) or M24 is the military and police version of the Remington Model 700 rifle, M24 being the model name assigned by the United States Army after adoption as their standard sniper rifle in 1988. The M24 is referred to as a "weapon system" because it consists of not only a rifle, but also a detachable telescopic sight and other accessories.
