The Unbearably Unstoppable Neutrino Trying

At the end of the tunnel, at a depth of about 400 feet, the whole motley of particles— protons that survived the graphite, pions and kaons that survived the steel pipe, muons and neutrinos— will plow into 50 feet of iron. This is called the beam dump. It will filter out everything but the muons and neutrinos.

The Unbearably Unstoppable Neutrino | Discover Magazine

The Unbearably Unstoppable Neutrino | Discover Magazine In fact, the apparatus is one of the world's biggest vacuum chambers. Air pressure inside it is lower than that on the surface of the moon and it has been installed to help solve a single, intricate problem: finding the mass of the universe's most insignificant entity, the neutrino.

Ghostly Cosmic Neutrinos Are Stopped Cold by Planet Earth ...

First of all , I'm french (yeah baguette baguette lol) so I'm trying to make as little mistake as possible so please forgive me if I do some froggy mistake. Nuclear winter update used to be cool at the beginning BUT , now we didn't see any update since a while so, I think it's time to move on something else.
